

Chris Currie – Vice President, Damar Security Systems

Chris is a graduate of St. Clair College of Applied Arts Technology where he earned a Diploma of Technology in Computer Science Technology – Information Systems. Chris has held numerous positions within the company, starting out as a field technician, moved to IT Administrator, Sales Manager and then to Vice President – Chief Technology Officer. Chris has grown up learning the company that his parents started in 1970 and at 34 years of age, Chris has been working in the Security Industry all of his adult life.

As Chief Technology Officer, Chris is dedicated to making Damar's business grow through his efforts in innovative systems design and implementation for clients.

Chris joined the company full-time in 1999 after working part-time while completing his education. Professionally, Chris enjoys leveraging the latest technology to provide intelligent, comprehensive solutions for the clients of Damar Security Systems. Personally, Chris enjoys spending time with his family, camping, traveling and spending time on the water with the family's personal watercraft.
